

Traditional Portuguese Potato “Caldo Verde” Soup

By Erin Fletter

Prep Time 20 / **Cook Time** 10 / **Serves** 4 - 6

Fun-Da-Mentals Kitchen Skills

chop: to cut something into small, rough pieces using a blade.

knife skills: Bear Claw (growl), Pinch, Plank, and Bridge (look out for trolls).

purée: to blend, grind, or mash food until it is thick, smooth, and closer to a liquid.

tear: to pull or rip apart a food, like basil leaves, into pieces instead of cutting with a knife; cutting breaks cell walls more, so herbs can discolor faster.

Equipment

- Oven
- Medium soup pot
- Blender
- Liquid measuring cup
- Cutting board + kid-safe knife
- Measuring spoons
- Ladle

Ingredients

Traditional Portuguese Potato “Caldo Verde” Soup

- 1/3 bunch curly or lacinato kale
- 3 1/2 C veggie broth
- 1 garlic clove

- 1 shallot
- 1 1/4 lbs Yukon gold potatoes
- 1 small green or yellow zucchini
- 2 T olive or vegetable oil
- salt and pepper to taste
- 1 tsp red wine vinegar + more to taste

Traditional Portuguese Potato “Caldo Verde” Soup

Instructions

Traditional Portuguese Potato “Caldo Verde” Soup

tear + measure + purée

Tear the leaves from **3 to 4 kale stalks** and add leaves to a blender. Throw out the stems (or, if you have a high-powered blender like a Vitamix, add the stems to the blender, too). Add **2 cups of veggie broth**. Purée until kale is blended into the liquid.

mince + chop

Mince **1 garlic clove** and **1 shallot**. Chop **1 1/4 pounds potatoes** and **1 zucchini**.

sauté + simmer + season

In a medium-sized soup pot, sauté minced garlic and shallot in **2 tablespoons of olive oil** for 30 seconds. Then add chopped potatoes, zucchini, puréed kale, and the remaining **1 1/2 cups of veggie broth**. Bring soup to a boil, then cover and simmer over medium-low heat for about 10 minutes, or until potatoes are tender. Season with **salt and pepper** to taste and **1 teaspoon of red wine vinegar** or more, just before serving. Ladle into bowls and top with Crispy Kale Chips (see recipe)!

Featured Ingredient: Kale!

Hi! I’m Kale!

"I'm a very healthy type of cabbage with dark green or purple leaves. Did you know that massaging my leaves with olive oil and salt makes them more tender? This is especially nice if you're eating them raw in a salad. Search, and you shall find a recipe for just about anything made from kale, even kale cupcakes!"

History

Kale may be experiencing an explosion in popularity over the past several years, but did you know that kale is an Old World staple in many countries worldwide, including Scotland, Kenya, Denmark, Italy, and Portugal? It's true. People have been enjoying kale for at least 2,000 years.

People in the Mediterranean area were the first to cultivate kale. They called it cabbage back in the day. In Roman times, cabbage was a significant crop and became a staple for peasants in the Middle Ages.

Kale made its way to the United States from England 400 years ago in the 17th century.

Despite its longstanding popularity all over the globe, the average American eats only two to three cups of kale per year. Check out how much kale you will eat today in our recipes!

Kale used to be called "peasant's cabbage," probably because it grew so abundantly. The modern name "kale" came from the Scottish word for the plant: "kail." In Scotland, in the 14th century, small gardens were known as "kailyards" because they grew so much kale.

In Ireland, years ago, on Halloween, single women and men would pull up kale stalks to predict the future of their love lives and wealth.

Anatomy & Etymology

Holy Kale! There are over fifty varieties of kale, even though we only see about three in the grocery stores! This limited supply is due to several types being inedible. Some are rather coarse, bitter, and indigestible. Ornamental Kale comes in many colors, including pink and white.

Kale leaves can be curly or straight, thin, and scalloped. Lacinato kale is popular because it is mild, and its thinner leaves are more tender than other types of Kale. Other names for Lacinato kale are Tuscan and Dinosaur (or Dino)!

Leaves can be either purple or green. Purple leaves have a slightly different nutrient content than green leaves, but both are nutritious.

Kale is part of the Cruciferous family of vegetables because of the shape of its flowers. Taste a piece of raw kale. Does it taste like anything you've eaten before? Other vegetables in this family include Brussels sprouts, cabbage, broccoli, and cauliflower—maybe kale tastes similar to one of these veggies!

Some kale varieties can reach up to 17 or 18 feet tall!

The word "kale" came from the Northern Middle English word for cabbage, "cale" (compare Scots "kail"), from Latin "caulis."

How to Pick, Buy, & Eat

Kale prefers to grow in cold weather, but it can be grown during any season and in most climates. Kale grown and picked during the winter actually tastes sweeter! That's because kale reacts to frost by producing sugars.

Kale is harvested when leaves have grown to at least 12 inches long. Each leaf is picked individually by

snapping the leaf off close to the stalk.

When shopping for kale, look for deep green leaves, unless it's the purple variety.

Before eating kale, wash each leaf under cold running water, as a lot of dirt hides at the bottom of the stalks.

Kale is super versatile. It can be braised, steamed, roasted into chips, dehydrated, blended raw into smoothies, added to soups, sliced and added to salads, or juiced.

In Japan, kale is dried, ground into powder, and added to drinks.

Nutrition

Kale is the Superhero of Vegetables. It has many antioxidants and vitamins that help keep us healthy, smart, strong, and feeling good.

Kale contains an incredible array of vitamins and nutrients, including vitamins A, K, and C, calcium, and fiber.

Remember what fiber does? It helps our digestion! Our intestines depend on fiber to work well and help us absorb the nutrients we need from our food (and get rid of what we don't!).

Kale contains over 45 different compounds that have been proven to fight cancer.

Because of an essential fatty acid in kale, called alpha-linolenic acid (or ALA), eating it may help prevent heart disease and stroke. Other foods high in ALA include avocados, navy beans, and edamame (soybeans).

The vitamins A and K in kale will be absorbed better if you eat it with a healthy fat, like avocado, olive oil, cheese, or olives.

Kale contains lutein, which is good for our eyes and vision. Lutein also helps kale retain its beautiful deep green color.

Kale includes more vitamin C than an orange and more calcium than milk!
